

Windturbines.ie

Job Description:

A position is available in a Wind turbine maintenance, refurbishment and servicing crew. The position will involve hands on mechanical and electrical field work in the routine servicing of large industrial turbines. Time will also be spent in a workshop refurbishing turbines and installing turbines.

Job Location: The position is based in Bandon, Co. Cork and will involve national and international travel. The position will require extended overnight travel and working conditions of up to 10 days abroad periodically.

Experience: Candidates should have a mechanical qualification and preferably some electrical experience. Experience of working with wind turbines in a servicing or manufacturing role will be a distinct advantage.

Applicants must be able to work as part of a two man team. A disciplined work ethic is required along with initiative and absolute diligence. This position will involve working at heights of up to 60m above ground.

Other Qualifications: Applicants should have the following qualifications

- Safe Pass
- Manual handling
- Working at heights
- Health & Safety Appreciation / qualification course
- Computer skills
- Full Driving Licence
- Forklift licence
- COSHH
- First Aid
- Appreciation of PSDP & PSCS

Training: Full training will be given over an initial 6 week period in Denmark with Danish service crews through English. Additional training will be given to the correct candidate to fulfil any gaps in training listed above

Salary: Full time position with attractive Salary and overtime

Contact: CV's should be emailed to
